

Securely control and share
your legal documents

DoxShare Secure Data Room

DoxShare is a data room designed for law firms to securely store and share documents with clients and external partners during transactions, such as a merger or acquisition. DoxShare comes with exceptionally high levels of hosting and security.

An instance of DoxShare Legal can be rapidly set-up at the start of a transaction and closed by the user at its conclusion. At this point a complete index of files is downloaded for compliance purposes and all the documents can be downloaded.

DoxShare Legal overcomes document management issues through delivering a clear audit trail of documents and controlling access. It eliminates the risk associated with sharing confidential client documents via email, as well as problems with multiple versions of documents, bulk sharing and lost documents.

Why use DoxShare?

- ✔ Improve Service Delivered to Clients
- ✔ Due Diligence File Index
- ✔ Data Room Configuration
- ✔ Disbursement
- ✔ Hosting & Security
- ✔ WebDAV Bulk Document Upload

DoxShare is a solution to a problem that a number of medium sized law firms have in respect of merger and acquisition transactions, it's at the right price and provides good levels of security

Craig MacKerracher, Harper Macleod LLP

Hosting & Security

For companies working within the legal industry compliance, data security, auditability and information control are crucial regulatory aspects for their business. As a solution designed for business users, DoxShare meets all these needs, delivering exceptionally high levels of security and privacy for your data over and above what mass market solutions can deliver.

DoxShare Legal Data Room overcomes security issues with organisations sharing critical documents, including intellectual property, via email – which can be intercepted by cybercriminals with even fairly basic skills – whilst also delivering better levels of service and business continuity, terms and conditions and hosting than mass market cloud storage solutions.

Why use DoxShare Hosting?

- ✔ Data Location Guarantee
- ✔ Data Ownership
- ✔ Encryption
- ✔ ISO 27001 International Security Accreditation
- ✔ Cyber Essentials Certification
